MUYA GT231 Coating Thickness Gauge

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

MUYA GT231 Coating Thickness Gauge

Manufacturer: Muya
Model: MEA-MUY-04540
Availability: In Stock

Description

A pocket-sized digital coating thickness gauge that uses electromagnetic induction and eddy-current sensing to measure paint, powder-coat, and other non-metallic coatings on metal, with a range up to about 1.8mm (71 mil) and accuracy around $\pm 0.03\text{mm}$. It supports zero, one-point, and two-point calibration, switches between metric and imperial units, and offers single, continuous, and difference measurement modes with auto power-off.
