SinoGnss CDC.NET CORS Software

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

SinoGnss CDC.NET CORS Software

Manufacturer: ERP Manufacturer #15

Model: SUR-SIN-04658

Availability: In Stock

Description

CDC.NET is ComNav's server-side CORS software for managing large, multi-station regional GNSS reference networks. It ingests raw observation data from all connected base stations, models regional atmospheric and orbital errors, and streams optimized single-base, RTD, or network RTK corrections to rover users. Built on a distributed AMQP architecture supporting BDS, GPS, GLONASS and Galileo, it delivers roughly 2cm horizontal / 3cm vertical accuracy over baselines up to about 80km.
