SinoGnss CDC Plus CORS Software

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

SinoGnss CDC Plus CORS Software

Manufacturer: ERP Manufacturer #15

Model: SUR-SIN-04659

Availability: In Stock

Description

CDC+ is the NTRIP-caster component of ComNav's CORS platform, distributing real-time base-station corrections over the internet to rover receivers via the NTRIP protocol. It provides a separate front-end/back-end design for stability, a live map view of connected stations and rover positions, and built-in user-account management, and is designed to serve large numbers of concurrent subscribers alongside CDC.NET.
