

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R9350 Ammonia Gas Detector

Manufacturer: Reed Instruments

Model: MEA-REE-04721

Availability: In Stock

Description

This portable ammonia gas detector uses a built-in sampling pump and telescopic probe to draw in air, displaying concentration readings on a 2.8-inch color LCD with visual, audible, and buzzer alarms set to user-defined thresholds. It stamps each reading with a real-time clock and date, and adds a low-battery warning with auto shut-off. Power comes from a rechargeable Li-ion battery or the included AC adapter, and the kit ships complete with filters and a carrying case for field leak-checking around ammonia-handling equipment.
