SinoGnss SV300 Unmanned Surface Vessel Full Set

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

SinoGnss SV300 Unmanned Surface Vessel Full Set

Manufacturer: ERP Manufacturer #15

Model: GEN-SIN-04767

Availability: In Stock

Description

The SinoGNSS SV300 is a compact, lightweight unmanned survey vessel -- about 28 kg and small enough to fit in a car trunk -- built for single-beam bathymetric surveys down to roughly 200 m depth. It combines dual-antenna GNSS positioning with an IMU and an automotive-grade dual-battery power system, plus safety features like shallow-water auto-return, collision bumpers, and obstacle detection, making it practical for rivers, reservoirs, and harbor surveys where portability matters.
