SinoGnss SAR 5000 Structural Monitoring Solution Incl. Accessories

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

SinoGnss SAR 5000 Structural Monitoring Solution Incl. Accessories

Manufacturer: ERP Manufacturer #15

Model: PRE-SIN-04781

Availability: In Stock

Description

The SinoGNSS/ComNav SAR 5000 is a tripod-mounted, non-contact ground-based radar built for real-time slope and structural displacement monitoring rather than point positioning. It scans a wide area to sub-millimetre precision, refreshing its deformation map roughly once a minute so operators can catch early movement on mine walls, cut slopes or unstable structures well before failure. The unit is a lightweight, portable package rated for harsh field conditions, with wide operating-temperature tolerance and dust/weather sealing, and it ships as a full accessory kit with its tripod mount as pictured. It is intended for mining, hydropower and other sites needing continuous, hands-off geohazard ...
