Toknav T40Pro GNSS Receiver rover set

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Toknav T40Pro GNSS Receiver rover set

Manufacturer: ERP Manufacturer #25

Model: SUR-TOK-2525206

Availability: In Stock

Description

The T40Pro is a rugged RTK GNSS rover with a magnesium-alloy, IP68-rated housing and hot-swappable dual batteries for over 20 hours of continuous field use. It tracks GPS, GLONASS, BDS, Galileo, QZSS and NavIC across roughly 1,400 channels, delivering RTK accuracy around 8mm horizontal / 15mm vertical. It adds a built-in photogrammetry camera and tilt compensation for AR-assisted stakeout and image-based coordinate capture, on top of standard survey/GIS rover functions.
