Toknav P8global Portable RTK receiver

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Toknav P8global Portable RTK receiver

Manufacturer: ERP Manufacturer #25

Model: SUR-TOK-2839607

Availability: In Stock

Description

The Toknav P8Global is a compact, pole-mounted portable GNSS/RTK receiver weighing about 141g, built with an IP67-rated magnesium alloy shell for field durability. It tracks multiple satellite constellations (GPS, GLONASS, Galileo, BeiDou) and uses Precise Point Positioning technology to reach centimeter-level accuracy without requiring a base station or CORS network. It connects via 4G and Bluetooth for data transfer and cloud monitoring, and is aimed at survey tasks like road construction, power-line surveying, and site leveling.
