Toknav T30Pro GNSS Receiver rover set

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Toknav T30Pro GNSS Receiver rover set

Manufacturer: ERP Manufacturer #25

Model: SUR-TOK-8082668

Availability: In Stock

Description

The Toknav T30Pro is a rugged GNSS RTK rover/base receiver in an IP68 magnesium-alloy housing, tracking GPS, GLONASS, BDS, Galileo, QZSS and NavIC across 1408 channels for roughly 8mm horizontal / 15mm vertical accuracy. It adds a built-in wide-angle camera for image-based (photogrammetry) surveying alongside standard AR stakeout and tilt compensation, distinguishing it from the base T30 model. It connects via 4G, Bluetooth and Wi-Fi, includes a 5W UHF radio, and runs on a hot-swappable 13800mAh battery rated for up to 48 hours in the field.
