SinoGnss XP100 Piling Guidance System, 1 Sensor

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

SinoGnss XP100 Piling Guidance System, 1 Sensor

Manufacturer: ERP Manufacturer #15

Model: GEN-SIN-04784

Availability: In Stock

Description

This is the SinoGNSS XP100 static-pile guidance kit -- the same 10-inch IP67 Android tablet, dual GNSS antenna mast and 2 cm-accuracy positioning engine as the base XP100 system -- configured with one add-on inclinometer sensor module for pile tilt/alignment feedback during driving. The sensor integrates with the tablet's software to give the operator real-time verticality data alongside the GNSS position readout, and the system still supports both RTK base and CORS correction sources.
